

Study of Health in Pomerania (SHIP-TREND-1)

Data dictionary - Variables and their values

This document contains study variables from the SHIP-TREND-1 wave, conducted from 2016-2019 with 2507 participants. The variables are structured by their examination. The left column contains the variable name, the middle column the label and the right column the value labels in case of a categorical variable.

Please note: This is a working document, some translations may still be missing. In this case it is replaced by the German translation.
